

## INSTALLATION GUIDE

# BreakEven Trail

Version 1.3.1 — NinjaTrader 8 Indicator

BreakEven Trail v1.3.1 is a stability update — same interface, same workflow, improved AutoTrail behavior, and full ProfitLock compatibility.

## REQUIREMENTS

<b>NinjaTrader 8</b>	v8.1.5.0 or higher (tested on v8.1.7.1)
<b>OS</b>	Windows 10 / Windows 11
<b>Account</b>	NinjaTrader account at ecosystem.ninjatrader.com
<b>License</b>	Activates automatically on your NinjaTrader account email at purchase
<b>Instruments</b>	All NT8 futures (ES, NQ, CL, GC, RTY, YM, MNQ, MES...) + forex
<b>Backtesting</b>	Not supported — Chart Trader / live and simulation only

## WHAT'S NEW IN v1.3.1

Stability release — no new features, no workflow changes.

<b>AutoTrail behavior</b>	Stop now advances one step at a time (same as manual BET clicks). Previously it jumped directly to market —
<b>ProfitLock compatibility</b>	BET AutoTrail and ProfitLock Auto-Lock now coordinate fully. No conflicts, no stop rollback.
<b>Safety improvements</b>	Internal pre-cancel guard: BET re-reads market price before modifying any stop order. Emergency fallback if m
<b>Trading logic</b>	100% identical to v1.3.0. Same buttons, same panel, same stepped-stop logic.
<b>License</b>	Same — no repurchase needed. All existing licenses are valid.

## INSTALLATION

Four steps — under 60 seconds. Imports just like any NinjaScript Add-On: Tools → Import → NinjaScript Add-On.

- 1 Download the ZIP**  
Lemon Squeezy sends a download email immediately after purchase. Download BreakEvenTrail\_v1.3.1.zip. Do not unzip — NinjaTrader needs the ZIP as-is.
- 2 Import into NinjaTrader 8**  
Tools → Import → NinjaScript Add-On... — select the ZIP file. NinjaTrader compiles and installs BreakEven Trail automatically. You will see a success confirmation dialog. Click OK.
- 3 Add to your chart**  
Open any chart + Chart Trader panel. Right-click the chart → Indicators → find BreakEvenTrail → Add. The panel appears at the bottom of Chart Trader immediately.
- 4 Set your offset and trade**  
Use [ - ] and [ + ] to set your offset in ticks (default: 2). Enter a trade. When price moves in your favor, click BE→ to protect the trade. Each subsequent click trails the stop by your offset from its current position.

## FIRST USE

### Before entering a trade:

1. Add BreakEven Trail to your chart (right-click → Indicators → BreakEvenTrail → Add).
2. Set your offset with [ - ] / [ + ] in the panel. Default is 2 ticks.
3. Confirm the displayed offset matches your risk preference.

### During a trade:

- First click — Moves your stop to Entry ± Offset. Profit target stays in place. OCO link preserved.
- Each subsequent click — Trails the stop +Offset ticks from current position. Always forward, never back.
- AutoTrail checkbox — Enables automatic trailing. Advances offset each step as market moves in your favor.
- Negative offset (BE-N) — Set negative offset (e.g. -10) to reduce risk in stages before break even. Panel turns amber.

### Status label reference:

Label	Meaning
SL: 4102 BE+2t	Stop at 4102, locked 2 ticks above entry — protected
SL: 3990 BE-10t	Stop still 10 ticks below entry — amber warning
No active position	No open trade on this chart — nothing to protect
Stop already protected	Stop already at or above target level — no action taken

## TROUBLESHOOTING

### Q: "BreakEven Trail not found" in Indicators dialog

A: Restart NinjaTrader after import. If still missing: Tools → NinjaScript Editor → check for compile errors under BreakEvenTrail.

### Q: Panel not visible after adding the indicator

A: Make sure Chart Trader is open on that chart (right-click → Chart Trader, or Ctrl+T). The BET panel appears at the bottom of Chart Trader.

### Q: "License not activated" / license error

A: Your license is tied to your NinjaTrader account email. Log in to NT with the email you used at checkout. Restart NT. If it persists, visit [breakeventrail.com/license-check](http://breakeventrail.com/license-check) or email [support@breakeventrail.com](mailto:support@breakeventrail.com) with your order number.

### Q: NT cancellation sound on every click

A: Tools → Options → Sounds → uncheck "Order Cancel."

### Q: Upgrading from v1.3.0

A: Import the v1.3.1 ZIP (Tools → Import → NinjaScript Add-On). NT overwrites the previous version. Your license is the same — no repurchase needed.

## LICENSE & SUPPORT

---

### Your license, your support

Your license is managed through your NinjaTrader Ecosystem account at [ecosystem.ninjatrader.com](https://ecosystem.ninjatrader.com). Log in with the email you used at purchase to activate, deactivate, or transfer to a new machine.

Your purchase includes all future updates at no additional cost.

### 7-Day Money-Back Guarantee

Not satisfied within 7 days? Reach out and we will refund 100% — no questions asked. Refunds processed within 5 business days.

### Support

<b>Portal</b>	<a href="https://breakeventrail.com/license-check">breakeventrail.com/license-check</a> — verify your license and open a support ticket
<b>Email</b>	<a href="mailto:support@breakeventrail.com">support@breakeventrail.com</a>
<b>Include</b>	Your NinjaTrader version, instrument, and Lemon Squeezy order number
<b>Response</b>	Within 24 business hours
